

## ED POLICY BRIEF

### Thank You for Supporting Advanced Math Pathways for Texas Students

We are delighted to announce the passing of **SB 2124**, a new law allowing more Texas students to access advanced math pathways in middle school. We sincerely thank **Senator Creighton, Representative Howard**, and their legislative staff for supporting and leading this work. We also thank our school district partners, **Hays CISD** and **Round Rock ISD**, who advocated with us during the 88th Legislative Session.

**E3 Alliance research** has found that students who take four years of math in high school are twice as likely to get a postsecondary credential, such as a certificate or degree. Moreover, students whose fourth year of math is a college-aligned course are six times as likely to get a postsecondary credential, driving economic mobility for the next generation.

SB 2124 is a bold step forward for Texas education. It is a policy based on evidence, equity and opportunity. It is a policy that will help ensure that all Texas students have the chance to reach their full potential and pave the way for other states to follow. We invite you to listen to KUT's coverage below.
